Allowable Subject Matter

Claims 25 and 40 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Akahane, discloses a system for warming a fluid including a cartridge, which is capable of being detachably attached to a fluid heating device including a heater for heating a fluid to be transfused, comprising: a zigzag- shaped fluid path, through which the fluid passes, and a contact section being capable of contacting the heater, said contact section being made flat and constructed of a material that is heat conducting and transparent, wherein a sectional shape of said zigzag-shaped fluid path, which is perpendicular to a flowing direction of the fluid, is formed into a polygonal shape with sides that are substantially equilateral. However, the prior art of record, and specifically Akahane, does not teach to one of ordinary skill in the art, in combination with the other limitations of the independent claims, a system for warming a fluid wherein the fluid warmer further comprises temperature control thermistors between each contact plate region on the upper section and in contact with opposing contact plates on the lower section or a contact plate which thermally couples the heating element with the film of the cartridge wherein the contact plate has a plurality of separate regions and a plurality of thermistors that are operatively coupled to the cartridge and which are also coupled to a processor, with each of the plurality of thermistors and the processor controlling the fluid traveling through the plurality of separate regions to a different temperature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
